Launch Goals

Project Knowledge Transfer

- Introductory Training to provide the necessary product knowledge for your requirement gathering

- Advanced Training to ensure we give you the tools needed to succeed with DistillerSR

- User Training to get Reviewers processing references sooner

Master Project Template

- Standardize your systematic review process and decrease future project start up time

- Develop and configure the workflows and forms based on your requirements

- Systematic review best practice recommendations

How We Do It

We take a holistic approach to making you successful. From configuring your first project, to consulting on a complex research set up, or training your team and answering support questions, we are here to ensure you are successful from day one.

Our Launch program includes:

Access to a Dedicated Solution Engineer

Project Management

3 months to complete all project activities
(additional time can be purchased if required)

Launch
Process
